For 225 years STAEDTLER+UHL KG has been producing pins and pin systems for the textile industry. Based on decades of experience in the field of combing cotton, we are offering our VARIO-System, top combs in different executions i.e. standard and self-cleaning (VARIOTOPPLUS VT), top comb plates (VARIOTOP FX and XL) and circular comb brushes RONDO-B for all types of cotton combers - for the very old as well as for the latest high performance combing machines.

Our recently developed new product line (VARIOTOPPLUS VT self-cleaning top comb pin strip and VARIO-COMB HP) is especially designed for RIETER High Performance combing machines like E65 and E62 working with high speed and for high production in order to achieve best combing results with these High Performance combing machines.

Together with our top comb plates VARIOTOPXL and the brushes RONDO-B we are now offering the complete range of especially designed spare parts for the latest generation of cotton combing machines.

Of course the availability of all standard types of this kind of spare parts will be guaranteed also in the future.

**Line of Business:**  
Spare parts for textile machinery

**Service Product Line:**  
VARIO-COMB, VARIOTOP FX and VARIOTOP XL top comb plates, VARIOTOPPLUS top comb pin strips, RONDO-B brushes for cotton combers

We are importers and agents dealing in Socks knitting Machine Parts and Accessories. We represent two Italian companies M/S IRMAC TEX Srl and M/S DORA ENRICO Srl. We also deal in Knitting Machine Needles and represent M//S Shandong Jinpeng Needle Industry Group, China.

We have more than ten years experience at our back and we always try to provide best quality parts at reasonable prices. We also offer IRMAC Brand Socks knitting machines which are best in Quality and Service. There are different Models available to knit all Type of socks.

**Amsler Tex Ag**

Experience, creativity and Swiss quality make Amsler Tex the longstanding leader in the development, production and marketing of devices for the manufacturing of slub yarn on ringspin or open-end frames and core yarn. Textile experts all over the world refer to slub yarn as «Amsler yarn, the Golden Standard».

They rely on Amsler Tex technology because they benefit from (1) increased spinning performance, (2) higher efficiency on the loom, (3) lower maintenance cost and (4) the countless possibilities to develop new innovative yarns. The development of new varieties of slub yarn for fashionable fabrics allows spinners or integrated textile groups to reinforce their relationship with their customers by providing not only commoditized "normal" yarn, but also high-quality, value-added products. See additional information on [www.amslertex.com](http://www.amslertex.com)

for the production of ribbons, tapes, belts, zipper tapes, hook and loop fasteners, labels with woven or slit selvages, gadget scarves, crochet tapes, lace products, nets, spacer fabrics etc.

**SUESSEN**

The Leader in Compact Ring Spinning and Rotor Spinning Technology

At SUESSEN, we feel that we are truly able to differentiate our products from those of the competition:

Our Technology Leadership in spinning, The excellent SUESSEN product range, The many benefits we provide for our customers in terms of improved technology and productivity Impressive return on investments achieved by the acquisition of modernization packages

At SUESSEN, we make considerable investments in continuous R & D, combined with applied research that is directly carried out at our customers' mills.

This ensures that we are able to further develop our technical and technological components in both an uncompromising and resolute manner. In particular, we focus on universal applicability, improved yarn quality, increased service life, reduced maintenance and proven reliability in industrial application.

SUESSEN co-operates with JINGWEI, in the field of EliTe@Compact Spinning

Fong's National Engineering Co., Ltd.  and Fong's National Engineering (Shenzhen) Co., Ltd. ("Fong's National") are the Group's flagship companies, specialising in design and manufacture of the textile machinery serving more than 10 sectors in the industry:

- Yarn dyeing: dyeing machines for loose fibres, hanks, yarn packages and warp beams;
- Piece dyeing: high temperature and atmospheric rope dyeing machinery and inflating dyeing machines as well as beam dyeing machines;
- Dryers: (fabric) pre-shrinkage (dryer) and package rapid dryers and radio frequency dryers for package, hank yarn and loose fibres; and
- Finishing: open width stretcher combined compactors.

The manufacturing plant in Buji, Shenzhen, is equipped with advanced facilities, including machines for laser and plasma cutting, computerised nibbling, forming, and X-ray weld seam inspection facility. Fong's National is the market leader, its success relies on constant innovation in product design and technology, and it is in line with the company's motto: "A Name You Can Trust For Your Dyehouse Needs."

Fong's National also provides its customers with comprehensive services. From pre-sales consultancy to after-sales services and maintenance, such as workshop planning, installation consultancy, processing test run and technical training, Fong's National offers its customers comprehensive services of the highest level.

#### Chemical Foam System

Chemical Foam System has its genesis in the 1970's at Union Carbide. The technology was then developed by Gaston County Dyeing Machine, who installed the first commercial units in 1979. In 1998, the Gaston Systems technology and personnel became independent of Gaston County. The core design team has been together since the beginning. With over 200 installations world-wide under our belt, Gaston Systems has a wealth of experience in a wide variety of applications. We routinely assist customers with chemical formulations and perform tests on our laboratory unit, which accurately relates to and repeats under actual production conditions. Laboratory systems are available for sale.

We provide full parts and service support to our customers and offer upgrades, refurbishments, and technical assistance as needed.

#### BONINO CARDING MACHINES

BONINO CARDING MACHINES produces woollen, worsted, semi-worsted, non-woven carding machines and cotton cards for reclaimed cottons. This firm offers its customers complete lines from fibre preparation to cards. These lines are expressly designed to process virgin and regenerated fibres.

BONINO CARDING MACHINES' production range is as following: preparatory machines (such rotary cutters, rag tearing lines, bale openers, sets of feeders for blending, blending boxes, material transport, openers for long fibres, openers for short fibres and willow cards) and carding machines (such cotton cards, worsted and semi-worsted cards, woollen condenser sets, non woven cards and cards feeding systems).

#### Fadis

Fadis was founded in 1960 with the purpose of manufacturing textile machines such as rewinders, soft winders, assembly winders, hank to cone winders, reeling machines, spooling machines and intermingling machines, which are meant to process all types of yarns such as cotton, wool, silk, artificial fibres, synthetic fibres, mixed fibres, intermingled yarns, fancy yarns. Thanks to the innovative constructional philosophy of the SINCRO range called "OPEN PLATFORM", it is possible to create, together with the customer, a machine which fully responds to his technical/production requirements, and which can be modified at any time to meet new market needs. This constructional flexibility allows the customer to identify - in a single basic model - all the processes he needs, with undeniable advantages with regard to personnel training, maintenance and production organization, and to be able to process all types of yarns. The machines with electronic yarn guide with precision crossing angle of the "SINCRO" range represent the maximum expression of the winding technology.

Thanks to a company experience of more than 48 years, to the most advanced technologies and to the innovative solutions, the SINCRO machines offer the topmost quality, productivity, reduced operating costs and versatility available on the market today.

DN Traders is established in 2006, with the aim to provide services to textile industry of Pakistan with excellence and in most professional manner.

We have come into the market with a different vision of sales and service.

Here we not only deal in sale of a product but would make it sure to assist our clients even before sale of the good.

We within such short time have achieved a quite important status in Textile Field which is the core of PAKISTAN exports and Backbone of PAK Economy.

We first would like to recommend you the best product, according to your requirement then would like to give you the best prices and then after sales of it.

### Therefore at every step you will find us.

DN Traders proud to be associated with the well known giants of their field. It is not easy to bring them into Pakistan.

After very tough negotiation and assurance we have made it possible for DN Traders to work with them.

We have high numbers of goals in our mind yet to be achieved and we are quite confident for those achievements.

### Eko Mianoor Trading

F-74-E, S.I.T.E.  
Karachi-Pakistan  
Tel: 021-2580403,2587426  
Fax: 92-21-2587427  
E-mail: mianoor@cyber.net.pk  
Contact Person: Mr. Mohammad Shahzad

Ekomianoor trading as the name shows began as the marketing operation of ekomak screw compressor turkey in Pakistan.

Muhammad shahzad (mechanical engineer) and umair mianoor (textile engineer) formed the company in Pakistan under technical guidance from ekomak. We started the operation by selling small screw compressor to the textile sector. Our objective was to provide round the clock service and uninterrupted compressor air supplies to our consumers. Focus has always been on service service and more service.

In five years, we have mashallah evolved in to a growing company that has sold more than 250 compressors and other textile machines in the highly competitive Pakistan market. In 2006, we have mashallah partnered with the world-renowned fusheng group of Taiwan. We are now offering high-pressure centrifugal compressors from fusheng group. Also we offer oil free water lubricated compressors from the same group. We also offer refrigerated air dryers and piston compressor from our Chinese principal jucai. We have now enlarged our portfolio to include ventilation, centrifugal pumpa, and forklifts. Material handling equipment and diesel generator other industrial requirements.

We mashallah enjoy a sound customer base and a fully equipped service and marketing team. we have a fully functional team in Lahore with guaranteed backup from Karachi.

Xetma Vollenweider is much more than only a new name. Xetma Vollenweider – these are well-tried textile finishing systems in a new quality. The two companies of the Xetma Vollenweider Group – Xetma Vollenweider GmbH (D) and Xetma Vollenweider AG (CH) – taken together represent almost 300 years of experience in the textile industry. Xetma Vollenweider GmbH was founded by Ernst Gessner in Aue (D) in the year 1850. It was only four years later that Ernst Gessner invented the first raising machine worldwide, employing the pile and counterpile raising principle, and thus laid the foundation for our production of today. This development of a universal wire raising machine with 24 rotating raising cylinders in the year 1886 was one of the most significant innovations in the field of raising. The system, for which Ernst Gessner had obtained a patent, is the basis of all drum-type wire card raising machines existing today. Ernst Gessner was granted 155 patents and numerous diplomas. His successors have taken over this innovative role and, in fact, more than ever do we feel committed to this tradition. Patented novelty developments from the recent past, such as the Multisystem machine with its unprecedented flexibility in raising, emerizing and brush sueding as well as the Twinsystem double-drum machine with an entirely new drum conception are coping with these high-level requirements.

Xetma Vollenweider AG, founded by Samuel Vollenweider in the year 1881, has for more than one century been representing the sound mechanical engineering of Switzerland. For over 80 years specialised in the development and manufacture of shearing machinery, Vollenweider has become a

well-established name which is associated worldwide with precision and reliability in textile finishing machines. Numerous innovations are proof of Vollenweider's leading role in the shearing sector. The Super Duplo cloth cleaning and shearing machine with a shearing unit of two cutting points and the first shearing machine worldwide having two shearing units arranged one above the other as well as the integration of a polishing unit with two polishing points for high-pile textiles into the Optima shearing machine are only some of the highlights engineered by Vollenweider. With the development of Vollenweider's Pyrotrop singeing technique in the mid-1970s, the range of products for cleaning textile surfaces was extended. The special-type burners of the Pyrotrop system, which is based on the principle of enclosed burner chambers, are a good example for Vollenweider's innovative role also in this field.

**Emsey Group – Turkey**

Address: Basaksehir, 4. Etrap  
 2. Kisim S Villalari S-28, Istanbul, Turkey  
 Phone #: +90 212 487 9410 (10 lines)

Emsey Group, is dedicated to engineering the industry as a global supplier by meaning of experience, know-how and customized solutions as:

**Textile:** Finishing and testing solutions, denim/jeans machines, fashion and management consulting.

**Mining:** Customized and wide range of mining machinery and complete plant solutions.

**Ind'l Laundry and Kitchenware:** Washers, washer extractors, tumblers, flat-work iron, refrigerator and freezers, ovens, ironing press, form finishers and more.

**Construction:** from building dressing up to any interior or exterior designs and contracting solutions.

**Chemicals:** Textile performance chemicals, construction chemicals, anti-icer and de-icing chemicals, and much more special formulas were all combined with made-to-measure engineering, traffic planning and projecting, processing and optimizing software, vehicle and fleet management, laundries.

Intertex Corporation is the representative of Textile Machine and Chemical Manufacturers in Pakistan. The company was established in 1988. It is based in Karachi with a sales office in Faisalabad and a liaison office in Lahore.

Intertex has supplied complete projects as well as numerous individual machines and equipment to customers all over Pakistan. The company has a complete setup for the sales as well as for the installation and commissioning of the machines including the after-sale service and trouble shooting. Intertex Corporation has well qualified engineers who have been trained on-site by the principal's engineers. In addition to this there is also an electronic lab in-house for the repair of the electronic equipment and laboratory machines.

Intertex Corporation is the sister concern of Fayyaz Enterprises which was established in 1975. Fayyaz Enterprises is a well reputed buying and out-sourcing house for the export of various kinds of textile products from Pakistan. Currently, this company is engaged in sourcing and buying of Garments/Apparels of woven and knitted fabrics and Home textiles from Pakistan to mainly Europe and USA.

Intertex Corporation enjoys excellent contacts and relations in the textile industry of Pakistan by virtue of its long, reliable and sincere service to the industry and vast experience. The founding fathers of the companies had been actively involved with the textile industry of Pakistan for more than 40 years in various capacities.

**Principal**

**Interspare Gmbh Germany**

(Artos, Babcock, Krantz, Famatex, Hacoba, Muller) Spare parts, modifications, service and new machines of the above mentioned leading brands. In addition M/s Interspare supplies spare parts for the finishing machines of other manufacturers too.

**Erhardt + Leimer Gmbh, Germany**

Cloth Guiders, Stenter Infeed Systems, Metal Detectors, Web Guiding and Spreading Devices, Knit Fabric Attachments, Fabric Slitting & Trimming Equipment, etc...

**Erhardt + Leimer Srl, Italy**

Weft Straighteners (ELSTRAIGHT), Pick Counters, Rope Detwisting and Opening Machines for Knitted fabrics and Towels, Finishing Squeezers, Scrays, Batches and Plaiters, etc...

**Texpa Maschinenbau Gmbh, Germany**

Automated Stitching Machines for Home Textiles, such as Automated Cutting, Length Hemming, Cross Hemming, Folding, Packaging Machines for Flat Sheets, Pillowcases, Fitted Sheets, Duvet Covers, Terry Towels, etc... Karmescreens (Karme Metal San. Ve Tic.A.S.) Turkey Rotary Screens for Rotary Printing Machines.

**Werner Mathis AG, Switzerland**

Laboratory Dyeing and Finishing Machines. Beaker Dyeing, Thermosol Dyeing, Pad Steam Dyeing, Drying and Curing Ovens, Printing Tables, Padders, Washing, etc...

**Bejamac Sa, Luxembourg / Belgium**

Henri Paulus Singeing & Desizing Machines. Brushing and Beating Machines. Raising and Shearing Machines for Fabrics and Towels

**Lacom Gmbh, Germany**

Fabric Coating Machines, Fabric Laminting Machines, etc...

**Bobotex Hans Ladwig Gmbh & Co. KG, Germany**

Anti-Slip Tapes, Roller Coverings, Felt Belts, etc....

**Expert Stephan Heuser KG, Germany**

Endless Felt Sleeves in various thicknesses for Fabric Shrinking Machines (such as Compactors),

Decatizing Machines, etc...

**Redman Co, Inc. USA/Turkey**

Raising wires for Raising Machines

**Bastian Wickeltechnik Gmbh, Germany**

Hydraulic Batch Winders and Unwinders, Hydraulic Rotation Stations, Re-Rolling Machines, etc...

**Wenk, Italy**

Endrings for Rotary Screen

**Albert Rose Chemie, Germany**

Coating Lacquer for Rotary Screens and Flat Screens. Retouching, Degreasing and Endring Gluing Chemicals. Adhesives for bonding of Textiles & Printing Blankets

**Synthomer Gmbh, Germany**

Lattices and latex compounds for a wide range of applications in Textile Pigment, Leather Finishing, Paper Industry, etc...

ITOCHU Texmac Corporation is a Japanese company well known in the world of textile machinery for the export of Complete range of JAPANESE TEXTILE MACHINERY AND SPARE PARTS with the concept of PERFORMANCE, QUALITY AND AFTER SERVICE SUPPORT. ITOCHU Texmac is proud of contributing the supply of best machinery to the Pakistan Textile Industry since 1949. Itochu Texmac is greatly

honoured to provide following spinning and weaving machinery:-

- 1- Toyota High Speed Roving Frames, FL100
- 2- Toyota High Speed Ring Frame, RX240New & RX240-E draft
- 3- Hara Draw Frames (Breakers-DX8 & Finishers DX8-LT)
- 4- Hara Lap former, SL100&HL100 and Combers VC5A
- 5- Murata Process Cone Winders, 21C:
- 6- Murata Doubler-No.28 and Twisters, 3C1
- 7- Toyota High Speed Air Jet Looms, JAT710
- 8- Kindai & Infinity Towel Hemming and Slitting machinery from Japan.
- 9- Others  
-Tateishi Cans, Kanai steel Rings, Kureha Aprons and Cots

**Ittehad Machinery Group of Pakistan**

240, Madina Market (Jubilee)  
Garden Road  
Karachi-Pakistan  
Tel: 021-2721079, 2722184  
Fax: 92-21-2768004  
E-mail: ittehad@cyber.net.pk  
Web: www.ittehadmachines.com  
Contact Person: Mr. Nadeem Raza

Ittehad Group is basically an Engineering Group established in 1970, manufacturing textile/sewing machinery and accessories thereof. The local made textile machinery could not compete the challenge of advanced technology of the World and hence confined to cottage industry. Ittehad Group entered into import of all type industrial machinery in 1981 and has now become one of the largest machinery groups in Pakistan. Being the largest importers of New and re-conditioned industrial machinery, Ittehad has proven a track record of steady and solid performance, which takes excellence and long term growth as a basis of its corporate philosophy. For the last many years, the latest high technology machinery like Multihead Embroidery, Sequin Embroidery, Richpeace -Takatori Auto Cutting System technology, Needle Detector machinery, Garment CAD Systems, Sunstar Automation Machinery Korea, and the latest Multipurpose Fiblon

Fusing Machines are now available in Ittehad Ware House round the clock. Ittehad Group is the only recognized importers and stockiest who are supplying any machine and every machine through out the country. People rightly say: The best short economy route to industrial machinery always passes through ITTEHAD only.

### **Principals:**

#### **SunStar Machinery Co., Ltd, Korea.**

Since founded in June 1974, SunStar Machinery Co., Ltd. has been committed to manufacturing industrial sewing machines for the past 30 years. It has led the development of Korean sewing industry with outstanding quality products. Furthermore as a top class sewing machine manufacturer, it is supplying best sewing machines to the world sewing industry. It succeeded in producing servo motors which can be applied to all types of sewing machines around the world. Sunstar's Jean-dedicated system is an automated jean production system and enables the immediate response to fast-changing and diverse fashion trends. It offers highest productivity and top quality by providing best sewing conditions.

#### **Richpeace Technology Group China.**

By the speedy development of last 20 years, Richpeace has grown up to be the leading role in China Textile and Apparel Industries. Specializing in R&D, Manufacturing, Sales, Exporting & Importing, Investment Management in Embroidery, Quilting, Knitting, Laser and Garment CAD/ CAM/ CIMS and the relevant accessories, with the aim of continuous reforms & promotion in the traditional industry by applying high technologies as well as advanced practical techniques, Richpeace succeed in all above mentioned industries. Richpeace is the only one firm in China who can provide customer real sense of electronic & mechanical integration, because Richpeace developed all kinds of computer control systems of different textile & garment machinery. So Richpeace has the best understanding & knowledge to make the computer control system with advanced software to match with high quality & super precision mechanical parts & components. Our Garment CAD/CAM Systems are well equipped to satisfy customer needs and diverging market trends. With High-Tech software functions, easy to use & easy to understand and available at very competitive price, Richpeace Garment CAD/CAM System have already been proved best in Pakistan Market.

Qingyuan Street Economic & Technical zone  
Shijiazhuang, Hebei, China

Hebei Taihang Machinery Industries Co., Ltd. has emerged as one of the Market leader of Roving Frame manufacturer in China. Their following models are now very famous in China.

**Roving frame FA421A** is suspended flyer roving frame specialize in advance and reliable structure. Good quality roving and reasonable overall management which is convenient for operation and maintenance. Machine is recently introduce and having tremendous success in Pakistan.

**Roving frame FA425** has removes the traditional cone drum drive system the building motion and the tension adjustment system. The drafting and the synchronize running of twisting are all controlled by the advanced industrial computer.

### **Dae Sung Co., Ltd.**

No. 55 – 23 Sang Pyung Dong  
Chinju, Korea

Dae Sung Co., Ltd., (South Korea) is maker of simplex bobbins. Ring Bobbins and Sliver Cans. Dae Sung Bobbins are made as per Toyoda specification using Poly Carbonate + 20% Glass fiber material with Special Epoxy Bushing.

Due to this reason almost 90% of all Toyoda RX240 and Toyoda FL-100 are now equipped with Dae Sung Bobbins.

## Japan Bel Ting Store

20, Munir Centre  
 Shahrah-e-Liaquat  
 Karachi-Pakistan  
 Tel: 021-2423998  
 Fax: 92-21-2473058  
 E-mail: japbelt@super.net.pk  
 Contact Person: Mr. Shahzad Nini

In 1978, Japan Belting Store was founded to fill the industry's need for high quality V-belts and Timing Belts. Since then, we have grown to become one of the country's leading companies in the belt market. We are currently the supplier of choice for major companies in Textile, Cement, Sugar, Jute, Chipboard, Food and Glass industries. They greatly appreciate the quality of our products and services. We have firmly maintained our founding tradition of "Market Quality-Sell Quality".

This is how we earn the loyalty of our customers and gain their confidence in our product. Over the last years 10 years, we are the sole agent and distributor of MITSUBOSHI Belting Ltd. in Pakistan.

We offer products used in a wide variety of equipments including those that are necessary for the protection of human lives. Our company is committed to the development of new technologies while adhering to its fundamental policy of giving attentive consideration to both humanity and nature.

MITSUBOSHI Narrow V – Belts and Timing Belts are one of the world's leading belts for the modern Narrow Cross-Section V-Belt drive. They are made by the most up-to-date production methods and advanced engineering technology to enable the use of space-saving drives. These belts transmit powers comparable to classical belts. These belts provide the advantages of a high-capacity wedge drive on machines which, until now, require the use of Chains, Gears, and Torque converters due to lack of space.

All MITSUBOSHI belts are made of specially

compounded synthetic rubber to give superior oil and heat resistance as well as static conducting properties- a feature that offers drivers safety under hazardous driving conditions.

With these advantages, along with many other competitive built-in features, anyone can obtain substantial savings through initial drive design and belt replacement costs.

We offer nothing less than the best services at all time. We welcome business people around the world to partner with us. We look forward to receiving your order.

Today we are the only dealer and importer of the following major brands:

## K&S Machinery

Web: www.megadyne.it  
Contact Person: Sh. Haseeb Ahmed

Megadyne Pakistan is working in the power transmission market for more than 30 years, the Megadyne group have achieved a position of global leadership in the transmission belt industry.

With 10 manufacturing plants, the group is able to meet many industrial requirements worldwide.

Moreover, the group is present in 30 different countries as well as in Pakistan under the name of Lahore Mills Store, offering a technical organization which grants effective support in meeting the many and varied challenges the transmission industry continually produces.

In addition to the traditional production of rubber and polyurethane belts, Megadyne recently added to its portfolio a pulley manufacturing plant, this allows Megadyne to grant the customer the complete transmission belt system.

Strategically placed logistic warehouses throughout the world offer a level of service unique in the power transmission industry today, the Megadyne organization services all major industrial counties, offering an unrivalled product range, available directly from Megadyne to local markets..

One of the most important characteristic of the group is our great flexibility and dynamism, we are able to approach any problem, whether using standard or custom made products to meet many if not all our customers requirements.

Legrom was founded at the end of the 1940's as a mold construction and plastic injection molding company.

Legrom has been manufacturing textile machinery components for the open-end and ring spinning processes for more than 40 years.

Our products are used both by OEMs in the original equipment as well as by the spindle manufacturers.

We have been supplying spare parts for textile machinery to spinning mills directly or via distribution partners – around the globe – for more than 25 years.

- The largest range of knee and locking brakes for ring spinning machinery worldwide.
- Many Legrom innovations are protected by patents and trademarks.
- Own production of stainless steel conveyor belts for ring spinning machinery with the highest precision possible.

## M.G. Engineering Associates

2nd Floor, Rabeel Chamber  
Near T.V. Station, Main Stadium Road  
Karachi-74800, Pakistan  
Tel: 021-4134119, 4134121  
Fax: 92-21-4917104  
Email: info@mgengg.com  
Web: www.mgengg.com  
Contact Person: Mr Muneer S. Godil

M.G. engineering associates is an engineering company specialized in setting up green fields projects and revamping / modernizing existing ones. we have established ourselves for the last several years and have a long list of satisfied clients in textile, pharmaceuticals, hotels, metals, household and process industries.

In times where energy costs are on the rise and awareness of environment concerns is growing globally. conservation in energy usage is need of the hour. the survival of our export oriented textile industry & other local industries, now largely depends on how energy efficient the manufacturing operations are in comparison to the regional competitors.

M.G. engineering keeps itself abreast of technological advancement and development of engineering solutions which are integrated into existing and upcoming industries to make them energy efficient. Our specialty is in infrastructure development with major emphasis on design & planning of utilities like boilers, power plants, co-generation, utility piping systems (including steam & condensate, water, compressed air, natural gas, thermic oil), di water systems, energy conservation projects. water desalination R.O. water plants & Electrical Distribution System Designing.

Also we are constantly engaged in balancing, modernization & replacement work for existing clients to expand, improve & to make their manufacturing units more energy efficient, this has created a long term on going relationship with our Clients who involve us as an engineering arm of their company.

## Company Profiles

At present, we are executing number of projects in textile sector. Our professional team comprises of engineers with hands on experience in their respective disciplines. Along with this m.g. Engg has technical collaborations with reputed international engineering organizations, who work with us on a project to project basis. Our success is a result of overall exposure that we have in all types of industries in pakistan. We have been able to effectively learn and implement the strengths of one industry to another, thus reaping the benefits of what ever resources that are available in the country.
