One of our most important management policies is to become a company, knowing the true value of

environment. Our lives depend on the environment and we think that our management is a part of our lives. Also, we believe that the environment is a valuable inheritance from our ancestors, and we borrow it from our children.

Every year a certain portion of the sales amount is invested on our own environment protection and pollution control program, such as a regular education of protection and safety of environment for our workers, an antipollution measure for air and waste-water treatment, etc. And, we concentrate our heart and soul on the development of more environmental friendly and less-wastewater-producing manufacturing process.

Reflecting our will on the protection of environment, we became the first member of ETAD (Ecological and Toxicological Association of Dyes and Organic Pigments Manufacturers) among the Korean dyestuff makers in 1995. In addition, we obtained ISO14001 certificate in Shi-wa factory from TUV Rheinland (Germany) in 1999. In the future, Oh Young Industrial Co., Ltd. will maintain our basic management policy toward environment and do much to help to preserve clean environment through constant research activities.

Dornbirn / AUSTRIA

Products: temples for weaving machines, rotors and navels for OE spinning, high performance products for the yarn path in texturing machines.

Established: 1884 „ Our customer is the yarn“
Emil BRÖLL GmbH & Co. is trend-setting in quality relevant components for staple fiber and filament yarn processing. The main focus is put on highly

stressed components contacting fibers and yarns. The development and manufacturing of system-components and compound units out of ceramics-metal-plastic is a specialty of Bröll.

Today custom-made high performance ceramics are so important for strategic reasons that Broell decided to install a complete production line and produce utmost possible quality in Austria. The Bröll components allow a boost in innovation for textile processing. The use of highly wear resistant and fiber friendly advanced surfaces leads to a worldwide product acceptance. More than 1 .200.000 navels and 500.000 rotors for OE-spinning are already sold to satisfy the requirements of our customers.

BRÖLL links material, surface and textile technology to fully developed high performance components. BRÖLL meets the challenging tribological problems in textile machine manufacturing and textile processing. The problems in textile technology– from fiber debris to problems in dyability in the textile chain – often are based on friction, wear and finish. BRÖLL solves those problems concerning yarn quality and productivity in all respects. A consistent realization and utilization of the material leads to a customized surface and to new BRÖLL-components. These are the reasons for the close cooperations between Broell and textile machinery producers all over the world.

Our highlighting products are:

Open-End spinning:

- BRÖLL navels: an innovative navel generation, to meet the requirements of our customers in respect of yarn structure, quality and productivity
- OE-rotors to meet the highest demands

Texturing:

- Low-Friction-rollers and ultra-smooth rollers
- Ceramic Twist stop for very fine to coarse textured yarns
- conTEX – two steps ahead: the high performance-friction disc-set

Temples:

- Best process stability, maximum durability and individually problem solving for each unique type of fabric – since 1884 - from BRÖLL.

"Our customer is the yarn"

Textile Avenue specializes in machinery, cotton, yarn, garments and home textiles. We are aiming to serve our customers with quality products and excellent after sales service. We have experienced and energetic team to serve the needs and requirement of the market to their utmost level.

Our business interest:

- **Textile Machinery**
- **Cotton:** Raw cotton - Shankar 6, V 797
- **Yarn:** Deals in yarn count ranges from 6 Ne to 80 Ne, double, three ply and four ply with or without slub, stretch etc. Agent for Hussain Mills Ltd.
- **Homotextiles:** Dyed and printed fabric in cotton, PC & CVC including Twills, Drills, Dobby, satin, Percale, canvas and sheeting.
- **Garments:** Woven, knitted, denim branded and non branded garments.

We offer rope conversion solutions for indigo rope dyeing ranges of world wide reputed manufacturers. Rope conversion from 24 to 34.

Our principals with international repute are known for performance and commitment towards service.

PRINCIPAL

DHALL ENTERPRISES & ENGINEERS LTD.

Dhall group today is one of the leading manufacturers of textile processing & finishing machinery. Established in 1959 & with more than, 40 years of experience, Dhall offers a comprehensive range of finishing machinery. Dhall group is involved in textile machinery & plants, ptfе (Teflon) products, plastic products etc. Dhall machineries are modern, similar in technology, performance, etc. To the international machines & are excellent value for money. Therefore Dhall machines have been

accepted in various world markets. Exporting to a large number of countries throughout the world, such as Poland, Bulgaria, Czechoslovakia, Russia, Thailand, Indonesia, Philippines, Singapore, United Kingdom, Tanzania, Nigeria, Cameroon, Kenya, Rwanda, Sri Lanka, Iran, Nepal, Bangladesh, Turkey, Egypt etc.

Their present manufacturing Range is:

FOR COTTON / SYNTHETIC / BLENDED FABRICS

- MENZEL – Dhall Singeing machine
- Chainless merceriser machine
- REISKY-Dhall Continuous pad dry range
- REISKY-Dhall Continuous pad steam range
- REISKY-Dhall Continuous pad batch dyeingM/C
- 3 bowl mangle with float drier / Hot flue
- Hot Air Stenter -Automatic dyeing jigger
- Open width carbonizing plant
- Mangle drying range
- Continuous fabric carbonizing plant
- Compressive shrinking range
- Bleaching / Dyeing jiggers
- Comfin machine
- Calender machine

DENIM

- Continuous over dyeing range
- Denim flat finish range
- Denim soft feel range
- Denim vacuum foam finishing &Shrinking range
- Denim wet finishing & Shrinking range
- Senter with coating head
- Denim singeing machine

FOR P/V BLENDED & WOOL SUITINGS

- Super'b finish machine
- Relax scouring range
- London shrunk machine
- Humidification & Steaming machine
- High speed cloth scouring machine with fulling plant (Dolly winches)
- Wool Fabric carbonizing plant
- Felt washing & chemical treatment plant
- Suction drum dryers

FOR RAW WOOL & CARPET YARN

- Wool scouring plant ·Wool carbonizing plant
- Continuous hank scouring machine
- Continuous hank yarn dryers
- Hank yarn dyeing machine ·Yarn bundling &

baling press

- Fully automatic twin chamber hydraulic revolving baling press

FOR KNITTED FABRICS IN OPEN WIDTH / TUBULAR FABRICS

- Pad batch bleaching machine
- Pad batch dyeing machine
- Open width scouring / washing range
- Relax dryers
- Compressive shrinking machine
- Stenter for open width knit
- Ballon padder
- Merceriser machine for tubular knits

JUPITER ENGINEERING COMPANY

Jupiter Engineering Company started its textile machinery manufacturing activity with Drum Driven Warping Machine as per the design of Lessona Warping Machine.

Since then, company has come a long way with active support of its clients and is at present offering Spindle Driven Direct Warping Machine with Centralized Tension Control Creel and High Speed Multi-Size box, Multi-Cylinder Sizing machine, both working with A.C. Frequency Drive with P.L.C. control and sectional warping. We also supply Indigo Dyeing-Cum-Sizing Range with PLC Control. Jupiter is now an ISO 9001 company.

Excellent quality control in manufacturing and prompt service after sales has helped company to retain its clients as well as approach new clients with confidence.

Jupiter has touched the new horizons. Today the company manufactures all types of Warping and Sizing Machines.

Jupiter's market has gone international during the last decade with exports to countries such as Nigeria, Bangladesh and Iran. The company is now looking to export its machines to other countries like Indonesia, Thailand, South Africa, Vietnam, Ethiopia and Ghana to name a few.

RABATEX GROUP OF INDUSTRIES

Rabatex Industry is certified ISO 9001:2000 Company. They employ more than 300 persons directly under their 4 manufacturing plants & 15

ancillary units. They can supply complete range of Sectional warping Machines in 8 different models for any application like pure Silk to Industrial Fabrics. Their more than 1500 installations of Sectional Warpers are working.

Their group company is also market leader in Material Handling Equipments for Weaving & Sample Warper of International Standard.

Company has exported their products to various countries like Nepal, Bangladesh, Thailand, Sri Lanka, Kenya, Nigeria, Egypt, Yemen & Tanzania.

During the initial stage the company launched a new concept in quick flow system of material handling equipment and storage system for textile industry & came out with new model, VM-107 Electronic Sectional Warping Machine.

Subsequently Rabatex introduced Multi point Servo Drive sectional Warping Machine Model VM-108 Servomatic.

Laxmi Ind. Systems & Stalmec Engg. Pvt. Ltd.

Our solutions are designed to provide maximum value at most reasonable investment and operational cost levels. Textile printing has become an extremely competitive business for our customers during the past years and so has the way we develop, design, produce and supply to our customers today.

Such environment means to meet a constant demand for innovation: technically, commercially and mentally. We committed to maximum simplicity in design and operation, as well as constant willingness to leave traditional paths where necessary and to go new ways.

The high performance MX3 rotary screen printing system which meets the needs of textile printers in today's competition environment.

One step further towards our goal: to develop leading textile printing technology for professional applications in combination with maximum cost effectiveness by utilization of modular components and state of the art microelectronics without compromise offering the best price performance ratio.

TEP (Pvt.) Ltd.

The Textile Engineers of Pakistan (Private) Limited. Since its inception in 1949 The Textile Engineers of Pakistan Private Limited has been serving the textile industry in Pakistan. TEP has the honor of being the first company in Pakistan which offered suppliers credit to the market and help initiate investment and industrialization in the textile sector.

TEP was initially a part of the Platt UK group which was one of the largest textile machinery suppliers of the 60s and 70s. In 1980 the current Chief Executive Mr. Syed Iqbal Husain of TEP took over the company from Platt Bros. UK and this became a 100% Pakistan Company. This was a turning point for TEP as now it had the opportunity to look beyond Platt Bros. and develop new business.

TEP has to its credit many new and Innovative products and equipments that it supplied to the Market.

TEP has always kept its focus on its customers and their needs and has always focused on providing equipments and machines which have helped our customers achieve a better end product. In addition to the new products TEP has also continued its association with companies which has lasted for over 50 years. This clearly shows the commitment as well the dynamics of the company.

Details of Prominent Principals of our Company
Bekaert Carding Solutions Ltd., Belgium.

Products: Complete range of card clothing for

Cotton, Man-Made Fibers, Non-Woven, Woolen and Worsted Spinning Industry. Card maintenance equipment.

Loptex Srl, Italy.

Products: Loptex Optosonic Sorter – Color and Colorless Contamination Removal System for Blow-room Line.

Reseda Binder GmbH, Germany.

Products: High quality wax rolls for various yarn applications. Special wax rolls for yarn conditioning and steaming application.

C-port JACOBI GmbH, Germany.

Products: Automatic traveling cleaners for spinning and weaving machines. Stationary suction cleaning system. Central vacuum cleaning system. Bobbin conveying system. High duty automatic card stripping equipment.

M/s Omega Center, Italy.

Products: Management, planning, quality control software and complete ERP solutions for spinning, weaving and finishing industry.

M/s Giovanelli, Italy.

Products: Automatic beam storage and handling equipment. Weaving beam stacking and warehousing equipment. Sectional warping machine. Beam transportation and carriage equipment.

Biancalani Spa, Italy.

Products: Airo - Machine for washing, drying and softening of fabric. Spyra - Continuous tumble dryer machine for softening and drying of fabric. Petra - Continuous fabric surface treatment machine for denim fabric for washed-out look.

Arioli Spa, Italy.

Products: Complete Scouring, Bleaching and Washing Range.

M/s TMT Manenti Srl, Italy.

Products: Calendering Machine. Kier Decatizing Machine, Crabbing Machine, Pressing Machine, Steaming Machine, Warping Machine, Brushing Machine.

M/s Saspe, Srl, Italy.

Products: Raising Machine, Shearing Machine, Sueding Machine and Surface Treatment Machines.

Toyota Tsusho Corporation (TTC) is a Trading House of a Toyota Group Japan, dealing in Automobile, Textile Machinery, Energy, Chemicals and other sectors. In Textile Machinery, TTC is handling Toyota / Hara / Murata & other brands from Japan & other parts of the world ranging from Spinning, Weaving to Finishing line.

Toyota High Speed Roving Frames FL16 & FL200:

We have largest share of Toyota Roving Frames either of FL16 & FL100 due to its productivity, quality and strong After Sales Service.

Toyota High Speed Ring Frame, RX240-G & RX240-E draft:

RX240 in the Art Technology in Spinning Frames and is re-known in the word of Productivity, Performance and strong After Sales Services.

Hara Draw Frame (Breaker DX8, & Finisher DX8-LT):

Hara specialized in Draw Frames and has its own name in the market with high class Quality.

Hara Lap Former, SL100 & HL100 and Comber-VC5A:

Hara Lap Former and Comber have strong standing in the Market for its quality and performance.

Murata Process Cone Winders, 21C:

Murata Cone Winder has largest share in the Market and are well known for its Productivity and Strong After Sales Services.

Murata Doubler-No-28 and Twister No. 3C1:

High speed Murata Twister and Doubler.

Toyota High Speed Air Jet Looms, JAT 710:

Toyota Air Jet Looms has largest share not only in Pakistan but in the World. Toyota has State of the Art Air Jet technology covers whole range of need space.

Toyota Sizer and Warper:

Toyota has complete range of Weaving Project including Sizing and Warping Machines.

Ichnose Toshin Rotary and Flat Screen Printing Machines:

Complete range of Rotary and Flat Printing from Japan.

Kyoto Dyeing and Finishing Products:

Complete range of Dyeing and Finishing machine for State of the Art Japanese Technology.

Todo:

Preparation for Weaving Process and Transportation Machines.

Niigata Power Plant for In-house Electricity Generation.

Xsis Apparel Machinery offers an extensive range of leather & textile processing & finishing machinery, accessories and spare parts. We represent a wide selection of some of the world's leading and most pre-eminent Textile Machinery Manufacturers, supplying equipment used in the manufacture, processing and finishing of leather, textiles and textile-related products.

Service

We strive to continue to provide the highest level of service to both our machinery Principals & customers.

Technical Competence Our qualified and technically competent sales staff offer consultative advice and solutions to meet our customers' requirements and can propose a wide range of competitively priced machinery and equipment, to assist in improving productivity, efficiency and quality whilst providing the fastest return on investment for capital employed.

Spare Parts

Our Spare Parts Department is available to offer technical advice on replacement spares with a view to ensuring quick supply and minimum machine downtime. Either parts are supplied ex-stock from our warehouse or where parts are not held in stock, our dedicated team sources and orders parts with emphasis placed on the quickest possible delivery at a competitive price.

Xsis Apparel Machinery continues to expand the range of textile machines and accessories that it can offer manufacturers with an impressive portfolio of agencies and we firmly believe in maintaining good and long term relationship with our principals and prestigious clients.

We produce 270 different industrial ironing machines and presses in Turkey since 1971 with high quality low prices, under ISO 9001 quality system according CE norms. Malkan exports to 5 continents and serves to more than 25000 customers. Today MALKAN is manufacturing its goods on 6000 m² closed area and exhibiting all machines in fully fitted out, two showrooms where enables our esteemed customers checking and trying.

Our production system has many national and international quality certificates like CE, ISO 9001, TUV and TSE. All our machines are produced through the latest technology of Trumpf-Germany laser cutting and bending system with very competitive price and quality.

We have 36 branches in Turkey, 23 sole agencies, more than 50 distributors and 19.000 references are still using 180.000 machines produced by our company with satisfaction all around the world.

We produce high quality with low prices. Malkan produces ironing presses , vacuum units , steam generators, ironing tables, finishing tables , toppers(air formers), rodeo finishing machines, fusing presses, transfer printing presses , tricot ironing machines , spot removing , leg turning machines and compressors , hat ironing machines , industrial steam hand irons and wide range all kinds of spare parts line.

Mactec was founded in 1995 and represents a technological reference for the realization of systems and equipment for the ageing of clothing items. The owing of a lot of patents and the unquestioned success of some equipment such as FGM, Teca, Kneematic and Margherita are evidence of

absolutely excellent research, and the relevant added value comes out in all the product lines.

The constant attention to the market demands permit dynamic research and scrupulous conformity with its needs.

Mactec uses innovation as the critical factor of basic importance for its success. For the 3-D effect our latest developments are : Margherita HP which dries up to 120 items per hour and Sandy Machine which, by sanding on dummies, not only guarantees an even effect by carrying out sanding operation at 360° but also highlighten colour shades at the edges . The horizontal sanding adds a 3-D-touch to whiskers and avoids the flattening effect.

We, as Metod Makina, are one of the leading Turkish machinery manufacturers, who are specialized in the production and sales of Industrial Curing Ovens for garments since 1998.

As having the mission of providing total machinery solutions in Garment Dry Processing, we are also producing Dye and Chemical Application Cabinets, 3D Crinkle Machines, Denim Effect Apparatus, Pressing Machines, Rodeo Machines and Automatic Chemical Application Equipments. Besides, we also provide Spray Guns, Temperature Measurement Labels and Spare Parts of all machineries in our product range.

Metod Makina is well-known in the Local and International markets thanks to its high quality machineries, excellent technical service during and after sales. Levi's Plants, in most of the countries including Turkey, Hungary and Poland, are using Metod ovens and other major plants in countries such as Pakistan, Jordan, Sri Lanka, Russia, Turkmenistan, Egypt, Morocco, and Syria are our valued customers.

By means of a hard working technical team, customer care based sales department and aim at producing solutions addressing customer demands

by frequent customer visits, we are having the right honour of keeping our reliability both in local and international areas. You may visit our website www.metodmakina.com and see the images of our machineries.

LIDEM

LIDEM is a Spanish machine manufacturing company where investigation and design are always constant. For this reason, LIDEM had been awarded several times due to innovation in its systems.

Product Lines

LIDEM contributes to your company with all kind of innovative technical solutions which assure your company productivity. LIDEM offers systems for the below stated fields.

CUTTING ROOMS

Systems for the spreading, cutting and stacking; roll slitting into ribbons, bands, tapes and bias. Useful for all kind of fabrics, knitwear, non-woven, polymers, glassfiber, etc.

STUFFING & PACKING

Systems for the fibre fine opening and pillows, cushions, cuddly toys, puffs, etc. Useful for all kind of fibres, feathers, foams, latex, porexpan... Vacuum packing or rolling packing systems.

TREATMENT & RECYCLING

Systems for the treatment and recycling of fabrics, fibres and non-woven. Stages: cutting, oiling, transport, metals elimination, storage and blending, feeding and tearing.

CUTTING & CRUSHING

System for the cutting and crushing of polymers and plastic materials, fabrics, non-woven, foam, latex, paper, cardboard, etc.

SPINNING

Bales breaking and opening, storage, blending, carding and non-woven lines feeding. Accessories for the pneumatic transport and metal elimination.

ABOUT US

Proses Machine was founded in 2002 to produce specialized Textile Machinery. Proses have been growing up continuously with the encouragement and support of our local and foreign textile industrialists.

The firm becomes a powerful manufacturer by sinking its investments from sector, expanding and renewing machine plant and also with its technical staff. Therefore Proses increases permanently its function and production quality in textile industry.

Proses Machinery pays particular attention to deliver orders, to give after sales service and technical support to its customers wherever and whenever needed always on time.

OUR GOAL

Our main goal is to be a worldwide firm producing specialized textile machines of high quality and incorporating latest technology available.

OUR PRODUCTS & SERVICES

TEXTILE SECTOR

- PROFIKS Yarn Steaming and Conditioning (Fixation) Machines 250 – 2000 kg / load

- PROBOBIN HT Sample Bobbin Dyeing Machines
- PROBOBIN HT Cone / Bobbin Dyeing Machines 10 – 1100 kg / load
- PROHANK Sample Hank Dyeing Machines
- PROHANK Hank Dyeing Machines 50 – 100 – 300 kg / load
- PROAKS Hank Spraying (Space Dyeing) Machines
- PROPOLI Continuous (Fancy Dyeing) Yarn Printing Machines
- Bobbin and Hank Centrifuges (Hydro-Extractor)
- PRODRYER Bobbin Hank Drying Machines
- Radio Frequency (RF) Drying Machines
- ECO-SOFT Sample Fabric Dyeing Machines 5 – 25 kg / load
- ECO-SOFT HT JET Fabric Dyeing Machines 25 – 250 kg / load
- ECO-FAST Sample Lycra Fabric Dyeing Machines 5 – 25 kg / load
- ECO-FAST HT JET Lycra Fabric Dyeing Machines 25 - 250 kg / load
- PYA Wet Fabric Rope Opening Machines Fabric Width 180 – 220 – 240 – 320 cm
- Fabric Continuous Pressure Steaming & Fixation Machine
- Stainless Tank Manufacture
- Special Design Machines and Devices (on customer's request)

AUTOMATION SECTOR

- Machine automation, panels and command panels with PLC Control
- PC base control systems and data (SCADA) systems
- Textile and Dyeing Machines automation, installation and modernizing
- Supply of electric and electronic goods
- Project consulting

Malkan Makina

We produce 270 different industrial ironing machines and presses in Turkey since 1971 with high quality low prices, under ISO 9001 quality system according CE norms. Malkan exports to 5 continents and serves to more than 25000 customers.

Today MALKAN is manufacturing its goods on 6000 m² closed area and exhibiting all machines in fully fitted out, two showrooms where enables our esteemed customers checking and trying. Our production system has many national and international quality certificates like CE, ISO 9001, TUV and TSE. All our machines are produced through the latest technology of Trumpf-Germany laser cutting and bending system with very competitive price and quality. We have 36 branches in Turkey, 23 sole agencies, more than 50 distributors and 19.000 references are still using 180.000 machines produced by our company with satisfaction all around the world.

We produce high quality with low prices. Malkan produces ironing presses , vacuum units , steam generators, ironing tables, finishing tables , toppers(air formers), rodeo finishing machines, fusing presses, transfer printing presses , tricot ironing machines , spot removing , leg turning machines and compressors , hat ironing machines , industrial steam hand irons and wide range all kinds of spare parts line.

Solarkaz International is a reliable name with perfection in quality manufacturing, being the

largest manufacture of steel fire tube boiler and supplies boiler to major corporations worldwide. Solarkaz is also the forefront of technological and environment developments in boiler industry.

Solarkaz boilers have the reputation of being the best in the industry because of continued research and development, cutting-edge technologies such as laboratory testing, paint processing, plasma cutting and heat treating.

Solarkaz products are recognized as symbols of perfection in the boiler industry for their:

Durability
Minimal Maintenance
Operational Efficiency

OUR SERVICES

- Supply of engineering machinery and equipments, like Boilers, Boiler accessories, HFO/Gas, Dual fuel engine driven generating sets, complete power plants up to 100 MW, Burners, Pump, Heat exchangers and water softening plants.
- Supply of chemicals and chemicals products for water treatment and fuel oil treatment, used in turbo gas and thermal power plants; chemicals for cleaning boilers, furnaces and other processing equipments.
- Provision of services for chemical cleaning of boilers, furnaces, evaporators and other equipments.
- Provision of after sales and support services arrangements of maintenance spares and supervisory staff.
- Computerized analysis and testing of boiler and process burners to improve combustion efficiency and reduce consumption of gas.
- Provide consultancy services for energy management, energy audit and design of cogeneration power system.

The Italian Trade Commission (I.C.E. Istituto nazionale per il Commercio Estero) is a governmental Trade Promotion Agency commissioned by the Italian Foreign Trade Ministry to foster trade and investment opportunities abroad. The Italian Trade Commission office network includes: 16 regional offices throughout Italy, over 36 offices within Europe, 7 with in NAFTA, 8 in Latin America, 2 in Oceania and 27 throughout the Middle East and Asia. Its primary task is to promote, assist and develop Italy's international trade by providing a comprehensive range of services, including promotional activities (participation exhibits in trade fairs in Italy and abroad, organization of symposia, workshops, seminars and conferences etc.), information, consulting services and training courses in international trade for Italians and foreigners. The public promotional program, elaborated annually, aims to consolidate and expand the Italian presence abroad in the traditional industrial sectors, to stimulate production involving a high level of technology, to select most dynamic markets to increase demand for Italian products. Italian Trade Commission assists Italian enterprises in their internationalization process, by providing technical information and expertise on the various aspects and forms of industrial and technological co-operation. It also provides foreign entrepreneurs with technical assistance and support during their search for Italian commercial partners or importers. It's equipped with a foreign trade database (S.I.N.C.E.) designed to supply first-hand trade and investment information and facilitate business contacts. It publishes specialized journals and magazines, guidebooks and market studies. Italian Trade Commission activity also focuses on the developing countries, searches for trade opportunities, promotes direct investment and other forms of co-operation, including management training courses.
